

Amherst College Press is a member of the Association of University Presses and is **fully funded by Amherst College**. We produce **pathbreaking, peer-reviewed scholarship and make it available to readers everywhere as digital, open-access work and affordable paperback books**.

As a **diamond/platinum open-access press**, we charge no fees to authors, their institutions, or readers. Our books are published on **Fulcrum**, a platform created by Michigan Publishing, allowing narrative to be richly integrated with multimedia and optimized for long-term preservation and accessibility.

if you see this symbol, it means you won't have to double check on our Library's website for access! that is: **more time to actually research!**

## Why Open Access?

Researchers often have to bypass paywalls and spend hours looking or asking for access to specific articles. We know this is the most tiring part of the job, but it doesn't have to be that way.

Open access is a broad international movement that seeks to grant **free and open online access to academic information and knowledge**.

A publication is defined 'open access' when there are no financial, legal or technical barriers to accessing it—that is to say when anyone can read, download, copy, distribute, print, search for and search within the information, or use it in education or in any other way.

We know you cross **many paywalls** in your literature review research on Google Scholar and beyond. Good news: you don't have to!

## How to support Open Access as a researcher

- Research your subject **first** on Open Access databases:
  - [Directory of Open Access Journals \(DOAJ\)](#)
  - [Directory of Open Access Books \(DOAB\)](#)
  - [JSTOR: OA & Free](#)
  - [Open Access on Project Muse](#)
  - [PubMed](#): community-led publishing platform
- Read from open access sources, like **[Amherst College Press!](#)**

To further support Open Access, you can always be vocal about it, engage in a student organization that advocates for access to knowledge, or even ask your professors to adopt open access materials in their courses. **If for researchers with resourceful libraries like you is already hard to access sources, imagine for those who do not. Support OA!**
